

Integrity Inspection Solutions **Differential Diagnostics** for the Life of Your Pipeline

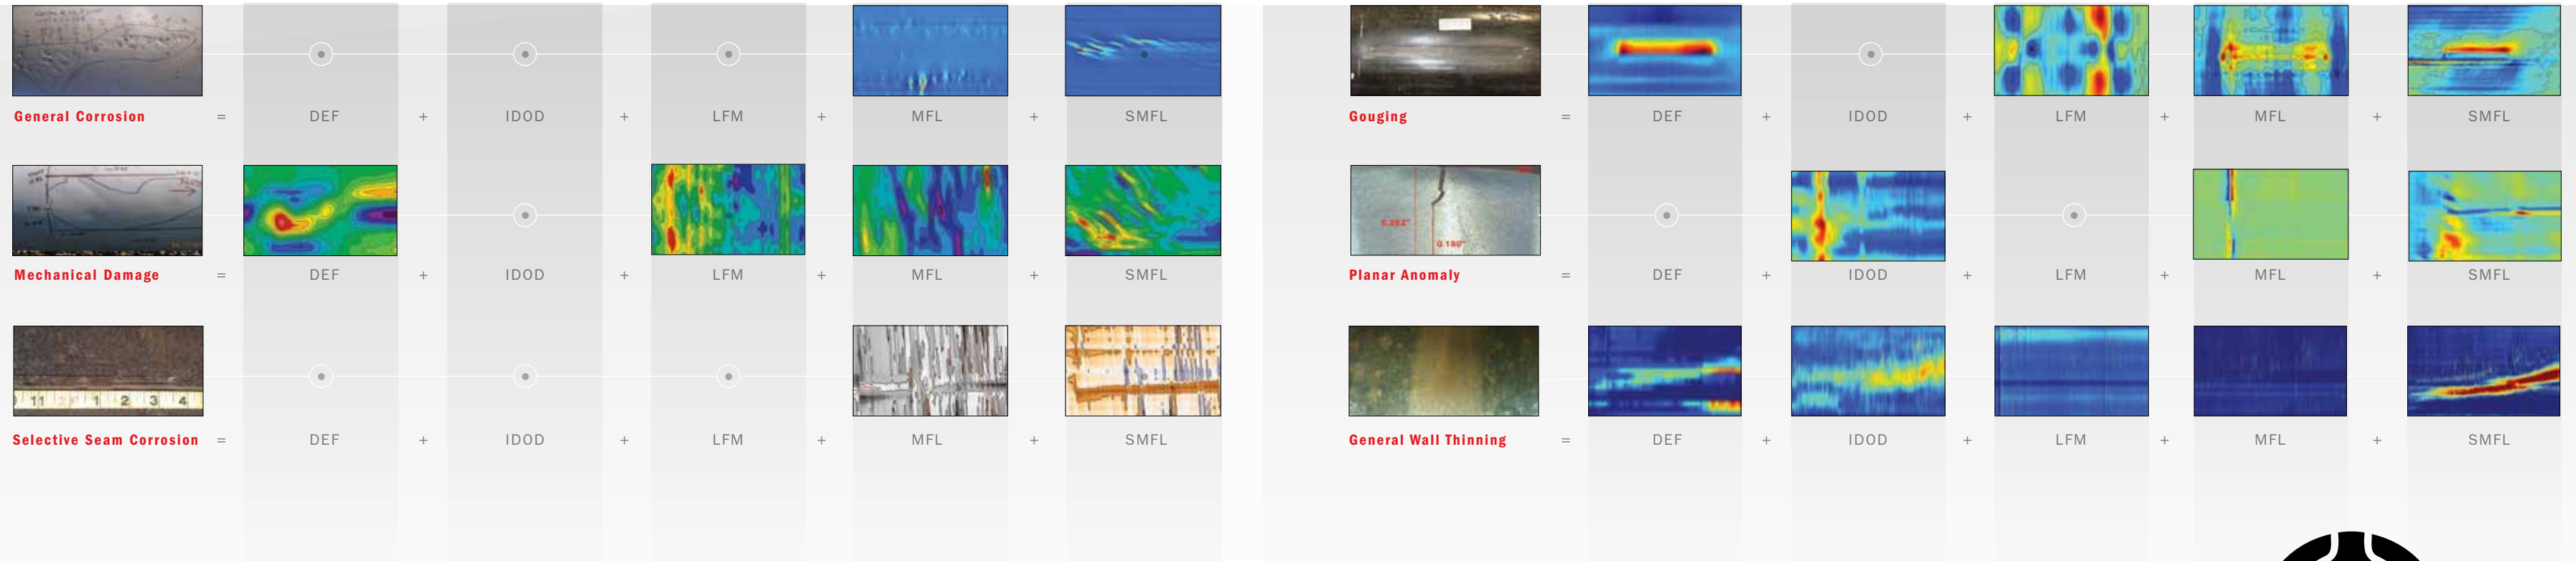

DEFORMATION (DEF) / IDOD / XYZ MAPPING

LOW FIELD MAGNETISM (LFM)

HIGH RESOLUTION MAGNETIC FLUX LEAKAGE (MFL)

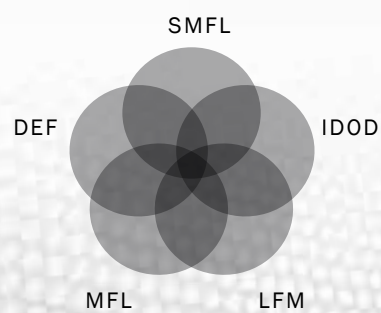

SpirALL™ MFL (SMFL)

ODOMETERS

Get the picture – only advanced TDW multiple dataset (MDS) technology provides comprehensive assessment in a single run:

- Axially-oriented Anomalies
- Metal Loss crossing Girth Welds
- Mechanical Damage
- Pipe Characteristic Changes
- Gouging/Metal Loss without Dent
- Girth Weld Anomalies
- Planar vs Volumetric
- Planar / Crack-Like Anomalies
- Pin-hole Sizing
- Hard Spot
- Bending Strain
- Low-Level Metal Loss in Seamless Pipe
